

## **ABCT PRICER**

ABCT Pricer Program is used for Institutional claims such as Inpatient, Home Health, Psych and Skilled Nursing Facility. This program is run after claims have been validated and loaded into Plexis Claim Manager. The intent of this program is to calculate and price, based on the CMS standard Medicare reimbursement calculations. That claim is updated with the additional pricing information, a note showing the pricing output and additional optional data.

ABCT uses the ABCT Pricer program daily in our capacity as a TPA, so we know that the software is robust and accurate. It has been in daily use since it was developed in 2006.

### **ABOUT ABCT:**

- Industry-leading experience with Plexis Claims Manager since 2004
- ABCT has been processing Medicare Advantage claims as a TPA since 2005 and Oregon Health Plan (Medicaid) claims since 1997
- Responsive and knowledgeable service

## Connection to Database

By using the drop down arrow, determine which database you wish to work with. Then click OK.

## ***Selection of Pricer***

The top tabs indicate the type of claims that can be processed. The tabs are Inpatient, Psych, SNF and HomeHth.

By clicking on Query, claims will be displayed that meet the requirements, in this case, Inpatient. Criteria: institutional claim that has not been completed-closed.

## Working with a Claim

Once you have the claims showing, select which claim you wish to work with. Highlight the claim you are interested in by clicking on the left side of claim number highlighting the whole row. Then click the Price button. This will run the appropriate CMS Pricer, and automatically feed it the keystrokes to populate the form, calculate the payment, and scrape the information from the screen. Note that it is important to NOT press any keys while this is happening (it only takes a fraction of a second).

You can view the output at the bottom of the screen, see what the total claim is, plus what pricing was found, and the final outcome after the rules and calculations have been applied.

The screenshot shows the 'ABCT Pricer - pcm\_ATRIO\_Test' application window. The interface includes a menu bar (File, Help), a toolbar with 'Query' and 'Price' buttons, and a data table of 'Inpatient Claims'. The 'Price' button is highlighted, and the calculated pricing is shown as 100%.

## Updating Claim into PCM

Clicking update will update the claim in Plexis Claim Manager with information calculated from ABCT Pricer, add a claim note with the text output from the CMS Pricer, and optionally set the Medicare Rate User Defined Field to the 100% of Medicare amount. (See Setup section.)

The screenshot shows the 'ABCT Pricer - pcm\_ATRIO\_Test' application window. At the top, there are menu options (File, Help) and a version number (12.0.0.13). Below the menu is a navigation bar with tabs for 'Inpatient', 'Psych', 'SNF', 'HomeHth', 'Config', and 'Settings'. A toolbar contains buttons for 'Query', 'Price', and 'Update'. The 'Price' button is active, showing a price of 10438.80 and a total of 10960.74. A status message reads 'Claim UB111123EDG0004 priced and updated.' Below this is a table titled 'Inpatient Claims' with columns for Claim ID, Claim Status, Provider, Payment Pct, Member ID, Admit Date, Disch Date, DRG, and Charges. The claim UB111123EDG0004 is highlighted. At the bottom, a detailed pricing breakdown is displayed for the selected claim.

Current  Append

Email Note

A note is auto created and attached to the claim showing the CMS Pricer payment screen output. This is very useful for audits, as this is a record of the CMS Pricer version and the ultimate calculated results for that claim.

### ***Inpatient Update Actions***

- Claim procedure Allowed amount set to Inpatient Pricer amount
- Claim procedure eobs “687” deleted from claim
- Claim procedure write\_off set to Claim procedure charges and Claim procedure status set to “APPROVED” for Claim procedures not like DRG or MS

#### NOTE: Detail

- Note User name set to SYSTEM USER
- Note Category set to “Claim Pricing”
- Note owner set to “Claim Pricing”
- Note subject set to “Inpatient Pricer”
- Note status set to “Open”
- Note priority set to “Medium”
- Note text set to Inpatient Pricer returned CMS Pricer text

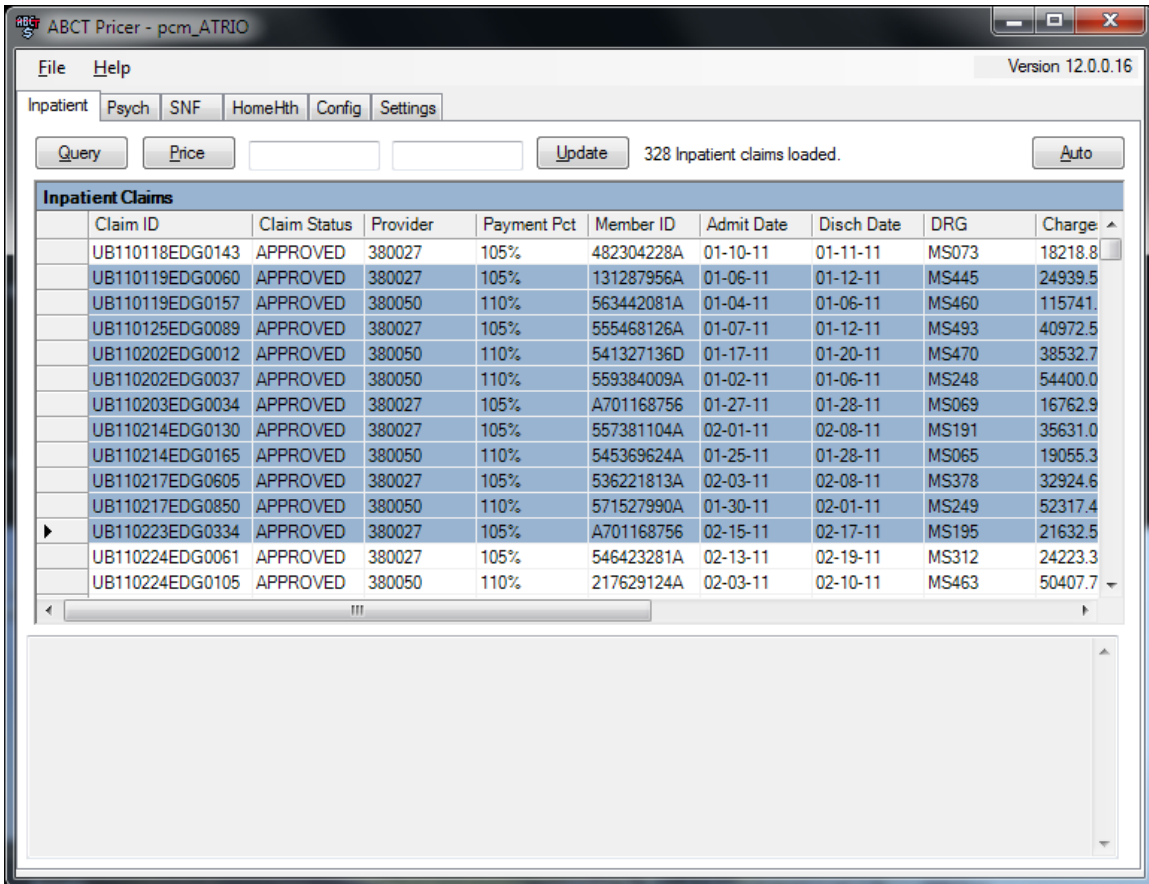

#### Episode:

- Patient Folder created if not existing
- Service category for Episode set to “Claims Hosp Inpatient”

## Automatic Batch Update

If you wish, you can Price and Update many claims with one button click using the Auto button found on the inpatient and Psych tabs. (This will be added to the other tabs in a future release.)

Simply click on a row, then shift-click on a second row to select a range. Auto will then price and update each claim listed in those rows of the grid.

The screenshot displays the 'ABCT Pricer - pcm\_ATRIO' application window. The interface includes a menu bar with 'File' and 'Help', and a version indicator 'Version 12.0.0.16'. Below the menu is a tabbed interface with 'Inpatient', 'Psych', 'SNF', 'HomeHth', 'Config', and 'Settings'. The 'Inpatient' tab is active, showing a toolbar with 'Query', 'Price', 'Update', and 'Auto' buttons. A status bar indicates '328 Inpatient claims loaded.' The main area contains a table titled 'Inpatient Claims' with the following columns: Claim ID, Claim Status, Provider, Payment Pct, Member ID, Admit Date, Disch Date, DRG, and Charge. The table lists 15 rows of data, all with a status of 'APPROVED'. The 'Auto' button is highlighted, indicating it is the focus of the instruction.

Claim ID	Claim Status	Provider	Payment Pct	Member ID	Admit Date	Disch Date	DRG	Charge

## Other Pricing Types

### SNF

The SNF Query includes the RUG (Resource Usage Groups) located on the top right portion of the Pricer screen. The information is taken from the database for the claim selected. An example is shown below.

The screenshot shows the 'ABCT Pricer - pcm\_ATRIO\_Test' application window. The interface includes a menu bar (File, Help), a version indicator (Version 12.0.0.13), and a tabbed interface with 'Inpatient', 'Psych', 'SNF', 'HomeHth', 'Config', and 'Settings'. Below the tabs are buttons for 'Query', 'Price', and 'Update'. A status message indicates '19 SNF claims loaded.'.

A summary table for claim 'UB111111EDG0053' is displayed, showing RUG codes and units:

RUG	Units	Current Allowed	Pricer Calc Allowed	100% Med
RVB30	3			
RVC20	14			

Below this is a detailed table titled 'Skilled Nursing Facility Claims' with the following columns: Claim ID, Claim Status, Provider, Payment Pct, Mem ID, Disch Date, Dx 1, Dx 2, and Dx 3.

Claim ID	Claim Status	Provider	Payment Pct	Mem ID	Disch Date	Dx 1	Dx 2	Dx 3

## Psych

Psych Query will display the claims meeting the criteria for Psych queries.

Claim ID	Claim Status	Provider	Payment Pct	Mem ID	DRG	Age	LoS	Prior Days	E
UB111017EDG0105	PENDING	380050	100%	126876874A	MS897	67	4	0	0
UB111025EDJ0606	PENDING	38S018	110%	202752398A	MS885	54	4	0	0
UB111116EDG0278	PENDING	380027	100%	331081919A	MS057	66	4	0	0

Each of the above functions works the same as the Inpatient tab.

## Pricers Tab and Updates

Updates on the ABCT Program are approximately every quarter, check the CMS website:  
For a given fiscal year, the PRICER release schedule is as follows:

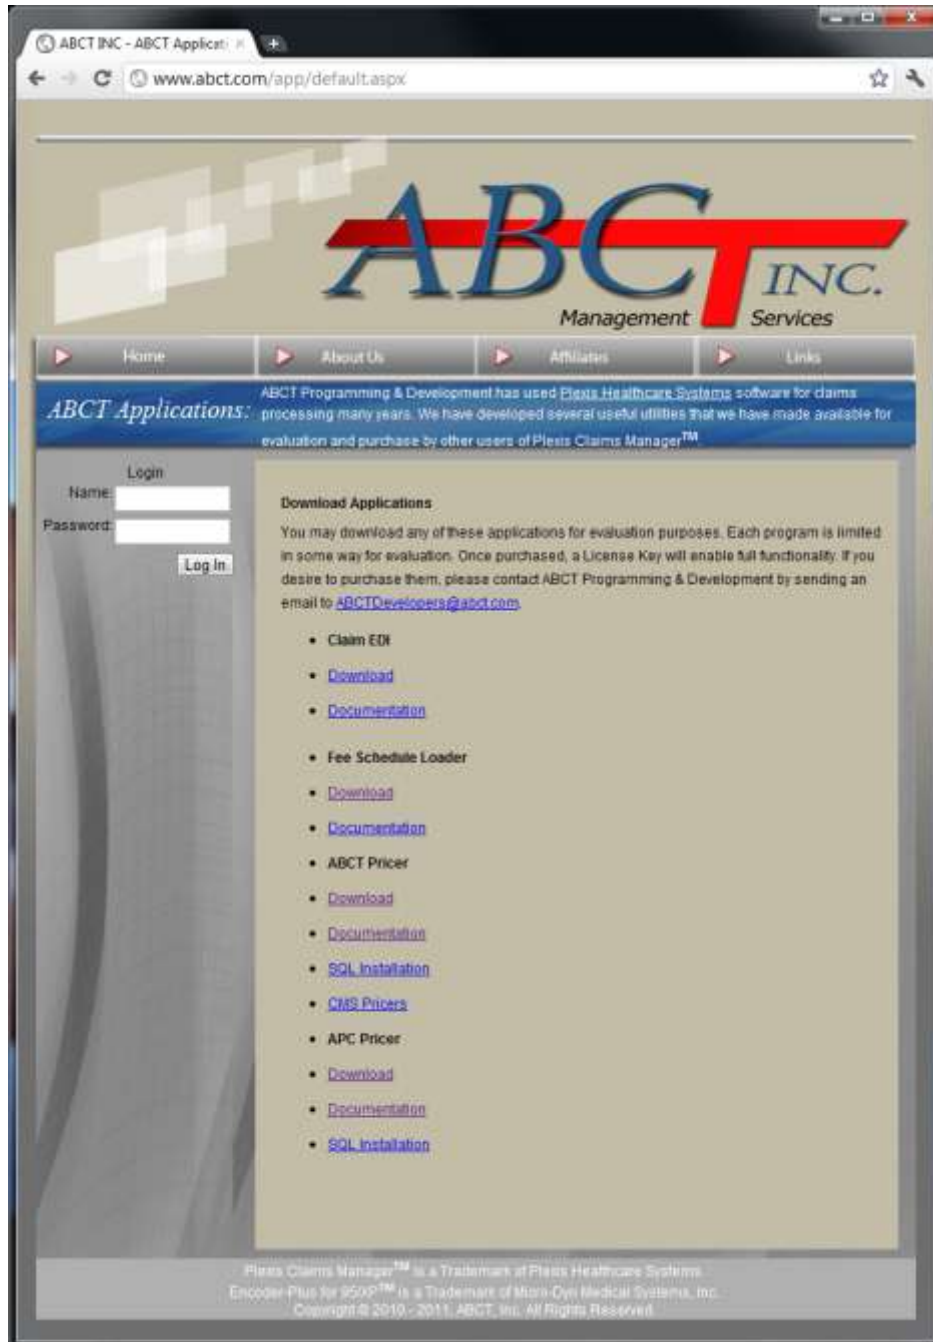

- Initial Release of PRICERS — October 1
- First Quarterly Release — On or about October 15
- Second Quarterly Release — On or about January 15
- Third Quarterly Release — On or about April 15
- Fourth Quarterly Release — On or about July 15

The screenshot shows the 'ABCT Pricer - pcm\_ATRIO\_Test' application window. The title bar includes the application name and version 'Version 12.0.0.13'. The menu bar contains 'File' and 'Help'. Below the menu bar are tabs for 'Inpatient', 'Psych', 'SNF', 'HomeHth', 'Config', and 'Settings'. The main area displays the 'ABCT Pricer Configuration' table with the following columns: Application, Eff Date, Term Date, Path, and Exe.

Application	Eff Date	Term Date	Path	Exe

## Installation of ABCT Pricer

Using your browser, go to our web site <http://www.abct.com/app/default.aspx> There you can install the application, download the documentation (PDF), the SQL installation script (ZIP) and the CMS Pricers (ZIP).

## PCM Configuration

### Providers

In **Plexis Claim Manager, Provider Management, Providers**, make sure that the Medicare (Legacy six-digit) Id numbers have been added for each Provider. (Use **Plexis Administrator** to create the MEDICARE Provider Id category.) ABCT PRICER uses the Provider Medicare (Legacy) number.

The screenshot shows a software window titled "(Provider) - [Editing]: TUALITY COMMUNITY HOSPITAL". The window has several tabs: Demographics, Practice Offices/Categories/Specialties, Vendors, and Medical Groups / Networks. The "Demographics" tab is active.

## Contracts

For each provider that is to use the Pricer, set up the contract as you would if PCM were determining the payment, including linking to fee schedules. (You will need the fee schedule for the Non-OPPS rates for some codes, if using the APC Pricer.) Check the “Use Allowed Amount” checkbox in the contract once the fee schedules are set up.

## Procedure Code Group

The Psych pricer uses a procedure code group to determine which DRG or MSDRG codes signify a psych claim. Create a code group named to **\$PSY: PPS DRGS** as shown below. (Note that our system uses the MS prefix, but you should use the codes as defined in your installation.)

Procedure Code Ranges			
Beginning Code	Ending Code	Effective From	Effective Thru
MS056	MS056	10/1/2007	
MS057	MS057	10/1/2007	
MS080	MS080	10/1/2007	
MS081	MS081	10/1/2007	
MS876	MS876	10/1/2007	
MS880	MS880	10/1/2007	
MS881	MS881	10/1/2007	
MS882	MS882	10/1/2007	

For your convenience, the DRG (MSDRG) codes are listed here:

Begin Code	End Code	Eff Date	Term Date
DRG056	DRG056	2007-10-01	
DRG057	DRG057	2007-10-01	
DRG080	DRG080	2007-10-01	
DRG081	DRG081	2007-10-01	
DRG876	DRG876	2007-10-01

DRG895	DRG895	2007-10-01	
DRG896	DRG896	2007-10-01	
DRG897	DRG897	2007-10-01	

## Plexis Administrator Definitions

Several definitions need to be made using **Plexis Administrator** in order for the automatic Claim Notes to be created correctly. Using the **Components > Edit System Tables** menu function, go to each of the following tables and add the items indicated below:

### Note Category

Claim Pricing

### Note Owner

Claim Pricing

### Note Subjects

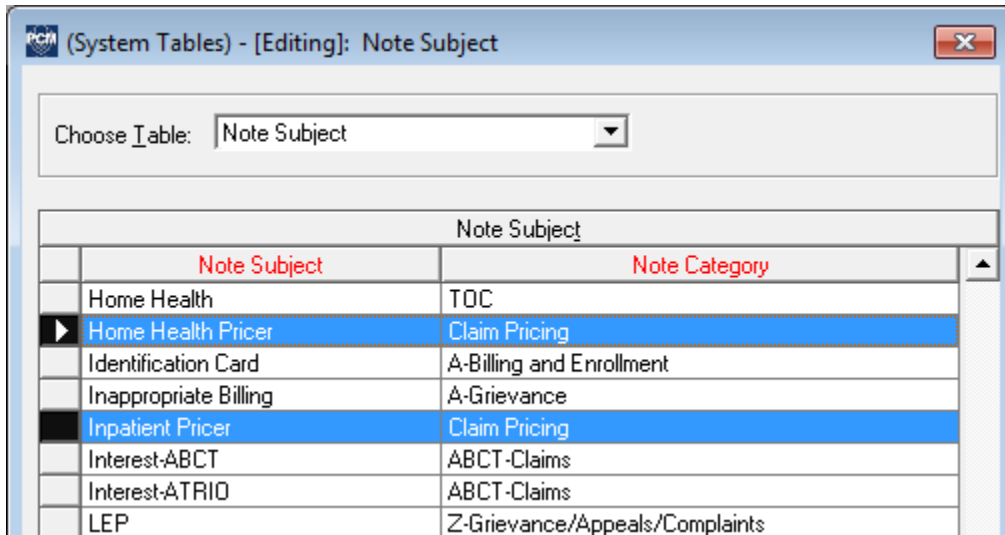

Inpatient Pricer

Psych Pricer

SNF Pricer

Home Health Pricer

*Note: Define each of the Subjects with the Note Category of Claim Pricing.*

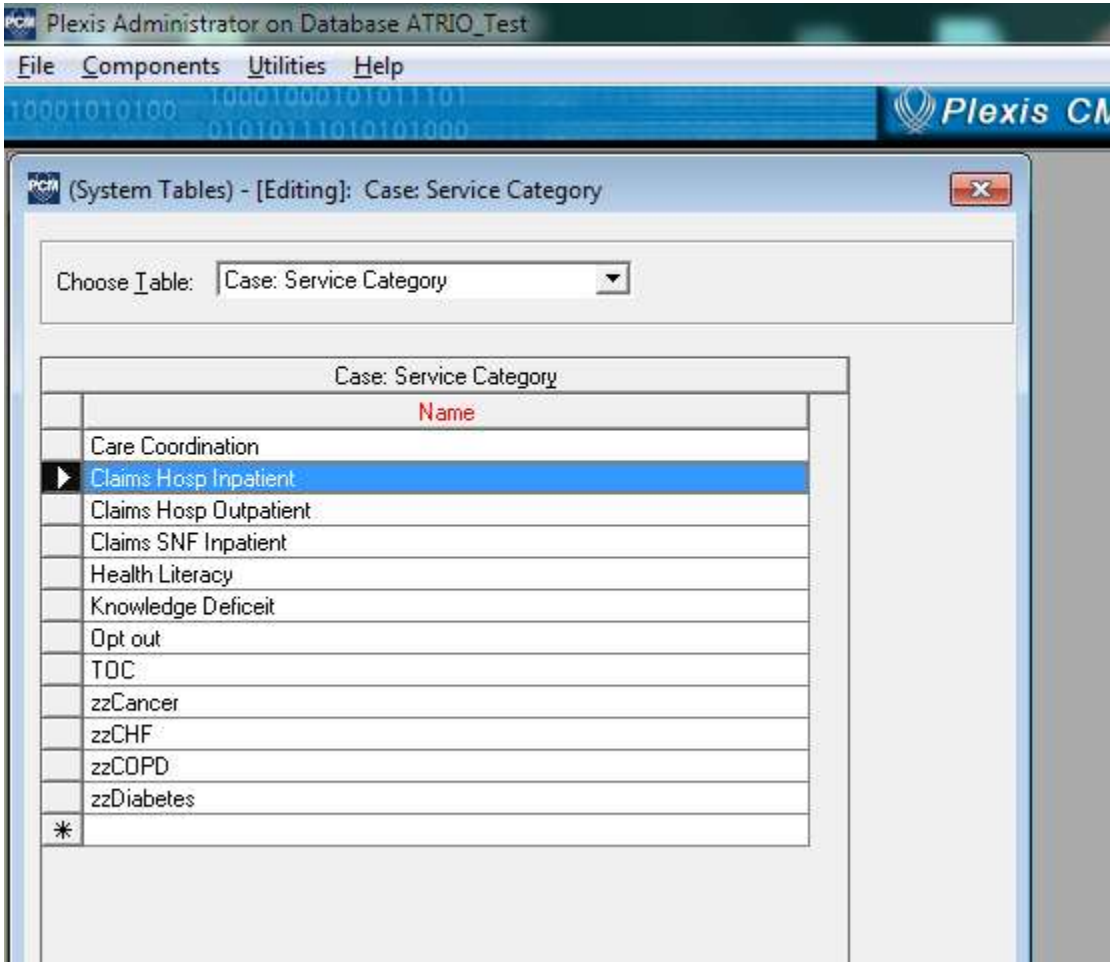

(System Tables) - [Editing]: Note Subject

Choose Table: Note Subject

	Note Subject	Note Category
	Home Health	TOC
▶	Home Health Pricer	Claim Pricing
	Identification Card	A-Billing and Enrollment
	Inappropriate Billing	A-Grievance
■	Inpatient Pricer	Claim Pricing
	Interest-ABCT	ABCT-Claims
	Interest-ATRIO	ABCT-Claims
	LEP	Z-Grievance/Appeals/Complaints

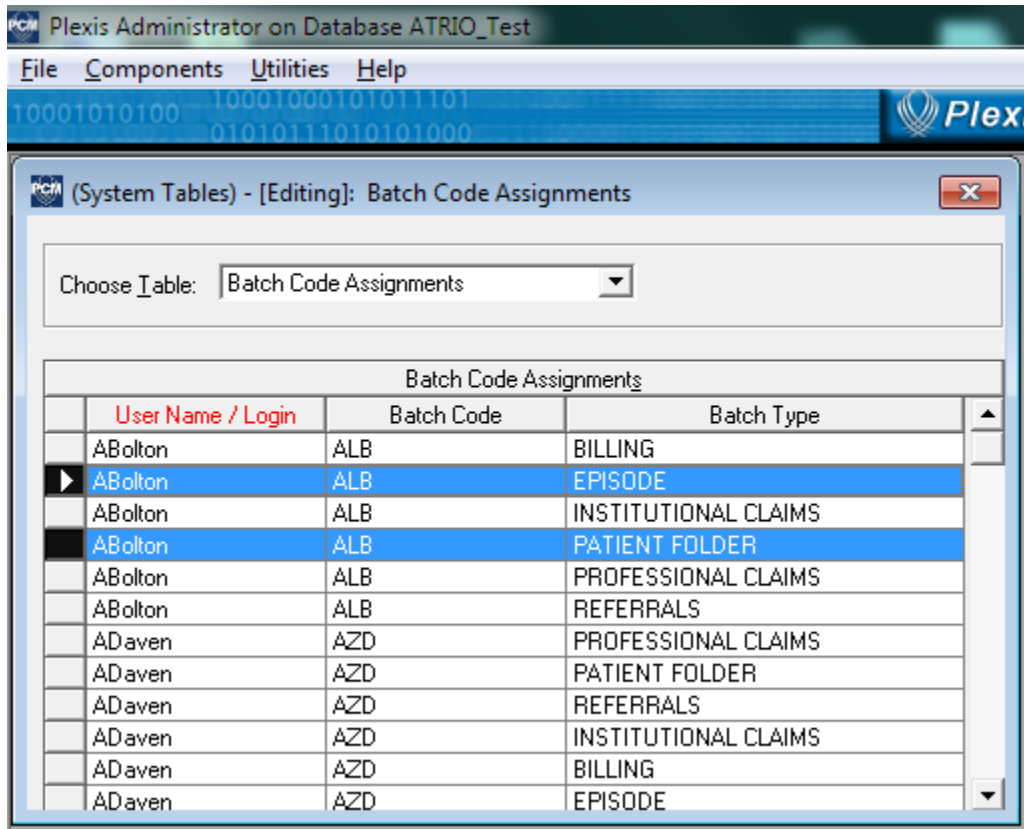

### Case: Service Categories

The Inpatient and SNF pricers will create or update an Episode for each Claim. Two **Case: Service Category** entries need to be defined for this to work: **Claims Hosp Inpatient** and **Claims SNF Inpatient**.

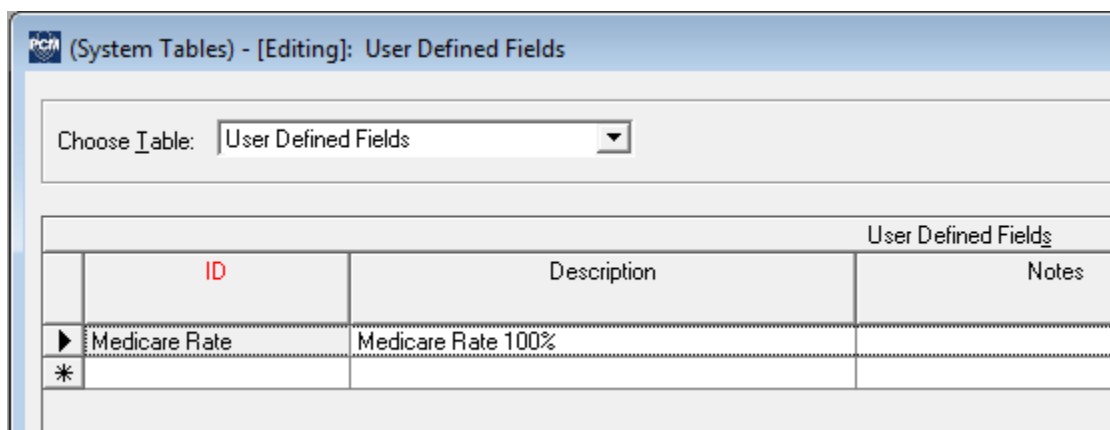

## Batch Code Assignments

Each user needs to have **EPISODE** and **PATIENT FOLDER** batch code assignments for Inpatient and Psych pricers.

## Medicare Rate

If desired, you can have the pricer record the 100% of Medicare Rate in addition to the calculated value by creating a User Defined Field named “Medicare Rate”.

## ***CMS Pricers***

Current and past CMS Pricer downloads and documentation can be found here:

<http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PCPricer/index.html>
